Remote Control

Did you know you can skip chapters, fast forward and pause when watching a show? YES!!! It is possible that you can select what you want to see when you want to see it! On the face of the purple remote you will find fast forward, reverse, pause and all the goodies your TV remote control has. In addition, on the lower right hand side of remote is a white tab - press it and the little tab will pop out revealing the chapter headings. The best part about the remote? It can't get lost under your couch pillows!
