## National Quilt Museum: Motion from the Contemporary QuiltArt Association

---

*Motion* is the latest exhibit at the [National Quilt Museum](#) in Paducah. It was created by the Contemporary QuiltArt Association who will be celebrating its 30th anniversary in 2016. Their interpretation of *Motion* is a presentation of quilts by 33 of their members.

From the museum:

*Motion is a key concept in design. By combining elements such as line, shape, and texture that make the eye move over the work, an artist can convey motion. Movement can be suggested visually through repetition, directional lines, placement of objects, diagonal lines, and gestural lines. A symbolic representation of movement can create an exciting abstract composition.*

More information about Motion from the Contemporary QuiltArt Association, [may be found here](#).

The exhibit runs from November 21, 2014 - February 23, 2015.
