First place with quilt African Equator!

[Story Submitted by: Eugenie](#)

I made the quilt named "African Equator" for an international contest at Aschaffenburg (Germany) that was held during September 28-30, 2007. The theme for the contest was "Colors of Africa". The ideas behind my design are the following: The colors of Africa are the colors of a continent that is divided in two by the equator. The colors are under the influence of this division. The face of Africa is also divided in two. I am very happy to tell you I won the first place prize with this quilt, a Bernina 440QE! More info about the contest is at: <http://www.main-quiltfestival.de/Wettbewerb.79.0.html> More pictures of the quilt can be seen here. <http://www.xs4all.nl/~mecano/Project-Q/>
