Which Rock Star Just Got His Own Pantone Color?

---

Color developed by  
**PANTONE**

This shouldn't really be a surprise, but Pantone just created a new color for a "royal" rock star.

It's Prince! The color is Love Symbol #2. It was created in collaboration with the estate of Prince Rogers Nelson (Courtesy of Pantone). The color was inspired by the hue of a piano he'd planned to take on tour, before passing away on April 21, 2016.
