What is a Fabric Folding Pen?

Fold fabric with a pen!

When we tried the Clover Fabric Folding Pen our exact words were "Oh my gosh this is so COOL!"

The Clover Fabric Folding Pen makes it easy to press a fold into fabric on the fly and without an iron. To use it, simply fill the pen with water and a few drops of the included marking solution and draw a line on fabric - either up against a ruler or free hand. Then fold where you drew the line and crease it with your fingertips, and voila - it stays folded like it had been pressed!

Imagine how easy it would be to make napkins with this!

We just received an order of Acorn Precision Piecing Kits!

If you missed out on them earlier, here is your chance.

Check out what customers have said about them:

- B. said, "I took a class from Shelley using these products and WOW! do they work! I highly recommend them."
- A. said, "I love the press pen on flannel... SO good!"
- C.N. said, "These products are wonderful! I use them all the time and they work very well and no damage to fabric. And no, I’m not on the payroll!"
Precision Piecing Without Pins

The Acorn Precision Piecing Kit gives you ultimate control in assembling quilt blocks and appliqué pieces, making everything go together more easily and precisely.

The kit has three components:

Seam Align Glue

Seam Align Glue is used in place of pins and holds your fabric pieces together more securely than pins with no slipping. The soft and flexible non-toxic glue comes in a squeeze bottle with a precision tip so that you can apply it with total accuracy.

Easy Press Solution & Easy Press Pen

Press your sewn block seams open, and then use the Easy Press Pen to apply the Easy Press Solution directly to the "high side" of the seam. Press again to get a perfectly flat seam that makes it easy to align and assemble quilt blocks.
