As Seen in Show 2508 - Fabric Magic®

---

**Fabric Magic®** is a sew-in interfacing that shrinks up to 30% to add texture and dimension to projects. It is quick and easy to use - just stitch it in place and then apply steam to shrink it. Results are permanent and will last through laundering. We can imagine using this to make so many textures - bark, flower centers, leaves, animal skin, stone, earth, etc. etc. etc. - or to add unique interest and depth to a project just like Sarah Ann Smith does in [Show 2508](#).
