" A two-sided pressing mat with a wool side for even heat transfer and a foam side to grip your fabric and keep it from moving or distorting while you press. In between the two is a unique core that minimizes the heat passing through.

This is a great portable pressing mat for bringing classes and retreats, and the two sides make it twice as useful.

- Works for all fabrics including cotton, wool, and silk
- Works with all home irons on any heat setting
- Absorbs heat and becomes very hot on the wool side, stays cooler on the foam side
